

LOGIBOT: ENGAGE 'AI', AGENTS, CUSTOMERS IN ONE PLATFORM

Market studies have shown that more than 85% of customers prefer chat over phone calls as a mean of communication. Adding Artificial Intelligence to the equation will be very powerful to a business. LogiBot is a scalable, seamless, user friendly & fully redundant chat communication channel that teams up agents & bots to meet and answer customers demands. LogiBot is easy to setup, configure, use and integrates within a company website, Slack or WordPress.

SMART ARTIFICIAL INTELLIGENCE

LogiBot uses proven Google AI that power all Google products to deliver the best automated experience. Agents can take over at any time.

EASY CHAT AND RICH MESSAGES

The chat is light and fast to guarantee the best user experience. The chat supports text inputs, emoticons, buttons, selects and lists.

MULTILINGUAL

LogiBot supports more than 30 languages including French & English. In addition, the admin page has the capability to translate everything into any language in seconds.

INTEGRATIONS

LogiBot can be integrated with any application that has an open API in Node JS, or most Google products. Intelogico will create this integration if deemed feasible.
